The Owner/Agent listed above, hereby requests that Rainbow Municipal Water District ("District") provide water service to the service address listed.

The Owner/Agent agrees to assume full responsibility for all charges on this account from the effective date of service and to abide by the District's policies and regulations. The Owner/Agent further agrees to notify the District when responsibility for this account ceases and to provide a forwarding address for the closing bill. If the Owner/Agent's account becomes overdue, the District retains the right to discontinue service after sufficient notification and to charge any applicable penalties and late fees. Responsibility for delinquent water bills by a tenant rests with the Owner/Agent. (State Water Code 71618, 72100 & 82101)

The Owner/Agent agrees to notify the District immediately of any proposed changes in their water system that allows injection of fertilizer or any other substance into the irrigation system or connection of any other water sources to their system. When the District Cross Connection Control Specialist determines the need for a reduced pressure principal backflow (RP), the Owner/Agent hereby agrees to abide by District policy to install an approved RP and maintain it at their expense.

BY SIGNING BELOW, OWNER/AGENT DECLARES UNDER PENALTY OF PERJURY AS FOLLOWS:

1. I have the following legal authority to submit an application for a water service connection as set forth above:
 - I am the legal owner of the parcel(s) subject to this request and have attached proof of ownership.
 - I am an authorized agent of the owner of the parcel(s) subject to this request and have attached proof of such authorization hereto.

2. I will immediately notify the Finance Manager of the District if any of the following occur at any point prior to completion of the water service connection application process:
 - a. I cease to have authority to request a water service connection at the subject property; or
 - b. There is a proposed change in ownership of the parcel(s) subject to this application. (See Section 6 below)

3. I hereby request that the District approve water service to the service address and for the use listed on this application with the understanding that all costs for installation, materials, appurtenances, and inspection shall be paid by Owner/Agent. Prior to starting work, Owner/Agent shall comply with the following requirements:
 - a. Obtain District approved improvement plans for construction of a water service connection to the main.
 - b. Obtain District approval for a connection to an existing water service.
 - c. Obtain the necessary State of California/San Diego County permits or approvals relative to the water service connection construction work; and if required, a State Highways Utilities Encroachment Permit and/or a County Encroachment Permit per the District's Construction Standards Manual.
 - d. Obtain approvals or permits for the service connection from utility companies, as applicable.
 - e. Work within the Right of Way shall be performed by a Contractor with an "A" license. The Contractor shall contract the District Inspector to schedule a preconstruction meeting and provide materials submittals for review and approval.
 - f. For parcels of over one acre, the owner agrees to have the property inspected for verification of the proper size meter.
 - g. Customers living in high pressure areas (150 PSI or above) will be required to sign a *Notice of High Water Pressure Condition* form and agrees to install a pressure regulator on their side of the meter. Customers living in low pressure areas (20 PSI) will be required to sign a *Notice of Low Water Pressure Condition* form and agrees to install at his/her cost a booster system to be owned, operated and maintained by the Owner/Agent, his/her successors and assigns.
 - h. Owner/Agent understands that the District assumes no responsibility for damage or injury due to water pressure.

4. Approval of this application for service is contingent upon payment in full of all water service connection fees, service charges, delinquent water bills and penalties due and charged to or against said property by the District.

5. A water service connection application is issued for a term of two years from the date of issuance. **The Date of Issuance of this water connection application is _____ and the expiration date is _____.** If the connection is not made prior to the expiration date, this water service connection application shall expire and all rights of the water service connection application holder resulting from the issuance of such application shall terminate. Fees paid with a water service connection application that has expired will be refunded, minus administrative costs, to the application listed on the application.

If, prior to the expiration date of the water service connection application, a building permit has been issued by the County of San Diego or governing agency for the building or buildings described in this application, and a copy of the building permit is provided to the District, the application shall not expire and need not be renewed. In such case, the District's application shall expire upon the expiration of the building permits.

If connection complying with all District Standards is made prior to the expiration of the application (or building permit per above), the application will become an authorized water service permit for the subject property(s) to receive potable water from the District's water system in accordance with all District rules and regulations related to the use described in this water service connection application. Once a service connection is made to the District facilities and extended to the property, the account is considered active and will incur water service charges per District policy.

6. If Owner/Agent desires to sell the property during the term of this water service connection application and transfer the water service connection application with the same parcel of land and use, the applicant must submit written notice of the proposed transfer to the District. The new owner must then complete a new application and the expirations date will remain the same.

- 7. I acknowledge that this request is subject to, and approval is conditioned on, compliance with current District policy. I agree that compliance with the conditions of this water service connection application shall be binding on the applicant, successors or assigns, and subsequent property owners. Prior to sale or transfer of this property after water service connection, I agree to provide written notice of the conditions set forth herein to the new property owner.
- 8. In the event the District incurs any costs or suffers any damage as a result of misrepresentation, any failure to notify District of a change in authority for this water service connection application, a change in ownership of the parcel(s) subject to this application, a change in control of water service under District policy, determination that this request is improper for any reason, or unauthorized use of the water service connection, I understand and agree that I will be solely responsible for, and will indemnify, defend and hold the District harmless from any such costs and damages, including, but not limited to, the District's reasonable attorney fees.
- 9. I acknowledge that the District has the right to refuse or to discontinue water service at any time to protect the District from any fraud or for noncompliance with, or violation of, any District policy, ordinance, rule or regulation of the District arising from this request.
- 10. The District shall endeavor to furnish continuous and sufficient supply of water to its Customers to avoid any shortage or interruptions of delivery. It cannot, however, guarantee complete freedom from interruptions. The District will not be liable for interruptions or shortage of supply, nor for any loss or damage occasioned by its failure to supply water. (Administrative Code Section 8.010.010)

If the applicant is not the legal owner of the property, describe the evidence submitted by the applicant to show his or her legal authority to make this request:

Cross Connection

An approved Reduced Pressure Principal Backflow Preventer (RP) is required depending upon the degree of hazard on sizes 1" and under. For service 1½" and larger an approved RP is mandatory on a potable water service connection. RPs must be tested by a Certified Tester immediately after they are installed, relocated or repaired prior to service connection.

Rainbow Municipal Water District assumes no responsibility for damage or injury due to water pressure. The undersigned agrees to assume responsibility for all charges on this account from the effective date of service and agrees to notify RMWD of any changes to the information stated above. The undersigned further agrees to notify RMWD when responsibility for this account ceases and to provide a correct forwarding address for the closing bill. If at any time this account is overdue, RMWD retains the right, after sufficient notification, to discontinue service and charge any applicable penalties and late fees. Responsibility for delinquent water bills by a tenant rest with the owner as authorized by State Water Codes 71618, 72100 & 72101.

General Information

Water Pressure

In most areas of the District, water pressure supplied to the meter is higher than the typical indoor household pressures of 40 to 70 psi. With a few exceptions, street pressure is provided by gravity. The drop in elevation between the storage tank and the area it services determines the street pressure and cannot be adjusted by the water district.

Pressure Regulators

Pressure regulators at your residence are considered part of the private plumbing system and are the responsibility of the customer to install and maintain. The pressure regulator is designed to reduce higher service pressures. Very low service pressures may necessitate the installation of a private booster pump system, which is also the customer's responsibility to install and maintain.

Meter Reading and Billing

Meters are read and billed monthly. The billing date is determined by your service location. RMWD Customer Service will be able to determine your billing date. Customers who have sewer service will be billed at the same time as the water services.

Water is charged per billing unit, therefore the charge is calculated on the number of units you consume during the billing period. One unit is 100 cubic feet or 748 gallons of water. This variable rate pays the cost of the District's water bill and administration. A separate fixed fee (O&M) is charged to pay for the cost of operating and maintaining the infrastructure. The monthly O&M charge is based upon the size of your meter.

Payment Options

Customers have the option to pay bills at the District front office or by USPS mail. Payments are also accepted at Union Bank of California, Fallbrook Branch. Payments can also be made easier via automatic debit to your bank account. Please contact Customer Service for details. The District does not accept credit payments at this time. Payments received after 4:00 p.m. will be posted on the next business day.

Hours of Operation

The Office hours are Monday thru Friday 8:00 a.m. to 4:30 p.m. District operators are available after hours for emergencies. The answering service will receive after-hours phone calls.

Agricultural Customers **(This program is not available at this time)**

Those customers who meet the criteria may apply for the Interim Agricultural Water Program credit as stipulated by the Metropolitan Water District. This program provides an "interruptible" discounted water rate for those who qualify. A certification and Acknowledgment form can be completed and returned to RMWD. Please contact Customer Service for details.
